

HEALTHCARE CONSTRUCTION

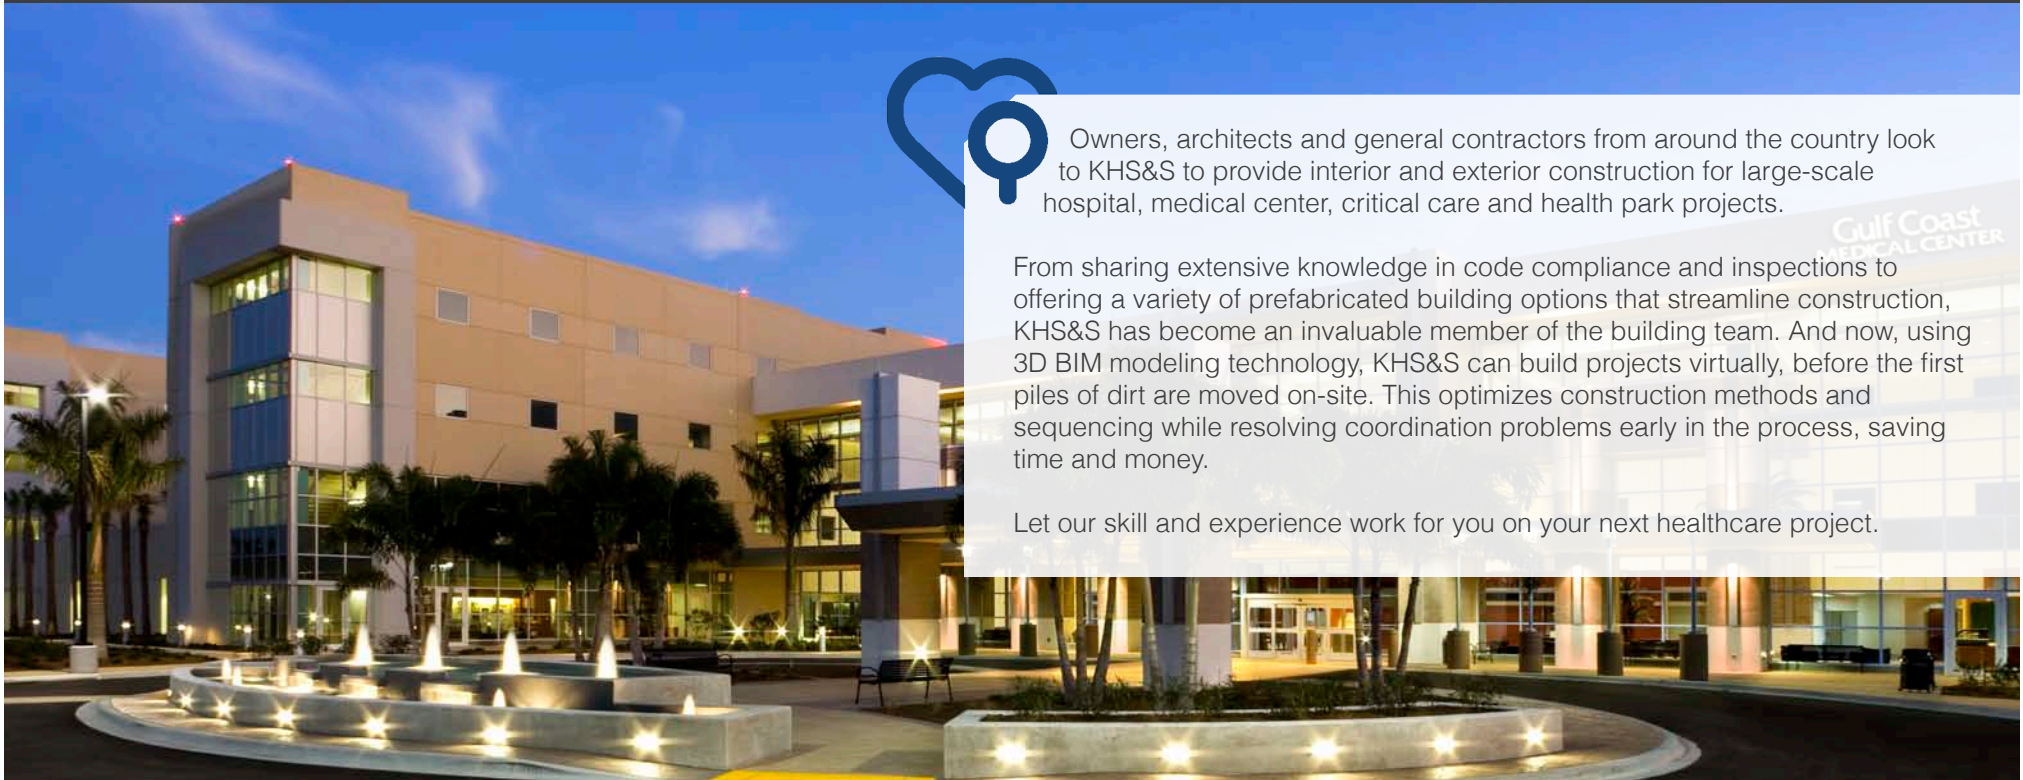

Gulf Coast Medical Center
Fort Myers, Florida

Owners, architects and general contractors from around the country look to KHS&S to provide interior and exterior construction for large-scale hospital, medical center, critical care and health park projects.

From sharing extensive knowledge in code compliance and inspections to offering a variety of prefabricated building options that streamline construction, KHS&S has become an invaluable member of the building team. And now, using 3D BIM modeling technology, KHS&S can build projects virtually, before the first piles of dirt are moved on-site. This optimizes construction methods and sequencing while resolving coordination problems early in the process, saving time and money.

Let our skill and experience work for you on your next healthcare project.
